WILL EMBARK MARCH 29.

First Infantry Unit of 26th Division Will Sail from Brest.

Boston, March 19.—A decision by the war department against the use of the army supply base at South Boston as a billet for the 26th division during its stay in this city for a parade and reception, was announced to-day by Colonel A. S. Williams, chief of staff of the northeastern department, who had just returned from Washington. Colonel Williams said it probably would be necessary to bring most of the men here from Camp Devens the day of the parade by automobile and by train. "And in that connection," he added, "I want to warn the people of New England who may be planning to come to Boston for the event, that they should come the day before the parade and leave the day after, as the use of railroads cars in New England will be very much restricted as far as the public is concerned."

Colonel Williams brought word back from Washington that the first infantry unit of the Yankee division would embark from Brest for Boston on March 29. The information came from the war department, but it was said the date was subject to change.

QUIT MEAT WHEN  
KIDNEYS BOTHER

Take a Glass of Salts Before Breakfast if Your Back Hurts or Bladder Is Troubling You.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid, which excites the kidneys, they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, stop eating meat and get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder weakness.

Jad Salts is inexpensive and cannot injure; makes a delightful, effervescent lithia-water drink, which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications.—Adv.

718 BEST SINGLE BOWLING

In the American Bowling Congress Tournament in Toledo.

Toledo, Ohio, March 19.—With 1,248 as the high mark in the two-man event and 718 the best effort to date in the individuals, bowlers taking part in the American Bowling Congress resumed play here this morning. High score in the five-man event is 2,322. Cavan of Pittsburgh holds first place in the singles. Officials of the American Bowling Congress predict that his figure will not be beaten during the rest of the tournament, which has nearly two weeks more to run.

GIRLS! GIRLS! TRY IT!  
STOP DANDRUFF AND  
BEAUTIFY YOUR HAIR

Hair Stops Falling Out and Gets Thick, Wavy, Strong and Beautiful

Your hair becomes light, wavy, fluffy, abundant and appears as soft, lustrous and beautiful as a young girl's after a "Danderine hair cleanse." Just try this—moisten a cloth with a little Danderine and carefully draw it through your hair, taking one small strand at a time. This will cleanse the hair of dust, dirt and excessive oil and in just a few moments you have doubled the beauty of your hair.

Besides beautifying the hair at once, Danderine dissolves every particle of dandruff, cleanses, purifies and invigorates the scalp, forever stopping itching and falling hair.

But what will please you most will be after a few weeks' use, when you will actually see new hair, fine and downy at first—yes—but really new hair growing all over the scalp. If you care for prettiness, soft hair and lots of it, surely get a small bottle of Knowlton's Danderine from any druggist or toilet counter for a few cents.—Adv.

LABOR'S TRIPLE ALLIANCE  
DEMANDING MUCH

And the British Government Is Taking Very Seriously the Matters Presented By These 1,500,000 Men.

London, March 19 (Correspondence of the Associated Press).—Labor's Triple Alliance, which just now is demanding much from the employers of England in the way of shorter hours, higher wages, and living conditions such as never before dreamed of by British workmen, numbers approximately 1,500,000 men with auxiliary forces of some hundreds of thousands more. Its demands have been taken very seriously by the government.

The Triple Alliance, which is regarded as one of the most powerful labor bodies in the world, is made up of the Miners' Federation of Great Britain with 800,000 members, the National Union of Railway Men with 450,000, and the Transport Workers' federation with 250,000. Outside it but dependent upon its action, because a strike of the Triple Alliance means unemployment for them, are the National Council of Colliery Workers, Locomotive Engineers and Firemen, the Railway Clerks' association, and a number of others.

The machinery of the alliance is simple. There is a small consultative committee made up of the chairman and secretary of each of the three organizations, while the three executives meet at least twice a year. Each body retains complete freedom to take action on its own behalf, joint action being confined to questions of national importance and questions of principle. Before a matter can be considered by joint action it must be fully approved by the executive of the body which raises it. The approval of at least two of the organizations must be obtained before any joint action can be taken.

To the present the alliance has not been called upon to test its power to the point of drastic action, but it has been far from idle. In 1916 it laid before Mr. Asquith, then premier, a reconstruction program which included the demand for full scale maintenance, failing work, of all workers during the period of reconstruction, a demand which is now being pressed upon the government. It was active in pressing for better pay, pensions and allowances for the soldiers.

The alliance decided to postpone action in the industrial field until after the war, but each of the three bodies drew up its plan for reconstruction, and these national programs were mutually discussed and considered in common. It is these plans that the government now faces under a threat of action that may plunge the country into the greatest industrial upheaval it has ever known.

HUGE RENTALS CHARGED

By Landlords in London Following Return of Soldiers.

London, March 19.—Frequent charges that landlords all over England, taking advantage of the scarcity of houses, have assumed the attitude of "buy the house at my price or get out" have been carried to the House of Commons with the result that the government has promised relief. During the Commons discussion it was stated that hundreds of families have eviction notices and cannot find a place to live.

In many instances tenants have been forced to pay three times the pre-war rental and in addition recently have received notices that they must purchase the property if they wish to remain.

The demand for houses at fancy prices is unprecedented. Landlords who invest in renting property are anxious to realize handsome returns on sales and argue that they are under no obligations to release property, particularly when by so doing they lose a big profit.

## ASQUITH MAY HEAD LEAGUE

Strong Feeling Develops in Paris in Favor of Former British Premier

AS FIRST PRESIDENT OF  
LEAGUE OF NATIONS

Inclusion of League Draft in Treaty Will Not Delay Signing of Latter

London, March 19.—There is a strong feeling in political and diplomatic circles in Paris in favor of inviting Herbert H. Asquith, former British premier, to become the first president of the league of nations, according to the Daily Mirror.

Paris, Tuesday, March 18 (By the Associated Press).—Inclusion of the league of nations covenant in the preliminary peace treaty will not delay the signing of the treaty, which, it is hoped, will be accomplished within two weeks, said Lord Robert Cecil of Great Britain, talking to British and American newspaper correspondents to-night. He said that three amendments to the covenant had been submitted, but added he was "sure there will be no difficulty in meeting all legitimate objections."

Discussing the Monroe doctrine and the effect of the league of nations upon it, Lord Robert said: "The Monroe doctrine is strengthened by the league of nations covenant because international action will be carried out by the organ of the league. The United States will be represented on each body, and since these bodies are international, no action can be taken without the consent of all. No action can be taken by the league which is opposed by the United States government unless such action should be against the United States itself, and that would not affect the Monroe doctrine."

"If, on the other hand, the view is that there ought to be a complete and watertight division between the American continent and the rest of the world, then, no doubt, any action in which America takes part would be an infringement of the Monroe doctrine. For my part, I should regard any such doctrine as disastrous to the future of the world. The war left the United States in a position of enormous power. With that gigantic power goes great responsibility to the world at large and to herself. The peace of the world is not only a European, but an American interest. America cannot afford to say that she has no interest in what goes on in Europe. If she did it would be false to the world at large and to her self."

BRITISH PROPOSALS  
FOR AIR CODE ACCEPTED

It Has Been Decided That Each Nation Has Sovereignty of the Air Above It; Subject to Granting of Permission for Passage of Foreign Aviation.

Paris, Tuesday, March 18 (By the Associated Press).—In a report submitted to-day the commission appointed to consider plans for an international air code announced that the British proposals had been, in the main, accepted. An international council will be formed as a section of the league of nations to handle all matters relative to aerial navigation. It has been decided that each nation is entitled to sovereignty over the air above it, subject to the granting of permission for the passage of foreign aviators. There is to be no discrimination against any nation by another, air pilots will be licensed on an international basis, and there will be international rules governing the right of way for airplanes and airships.

IF HAIR IS TURNING  
GRAY, USE SAGE TEA

Here's Grandmother's Recipe to Darken and Beautify Faded Hair.

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the mixture; you can get this famous old recipe improved by the addition of other ingredients at a small cost, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural color and luster of your hair.

Everybody uses "Wyeth's" Sage and Sulphur Compound now, because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous.—Adv.
